Overview of services and costs

The baubook product declaration is free of charge and can be used to check criteria at any time. The initial quality assurance of the product data by baubook and publication on the baubook web portal, including data export, are subject to a fee. The „product service & publication fee“ includes ongoing quality assurance of products. Product updates can be carried out free of charge at any time. All changes are validated and quality assured by

baubook. The product service & publication fee is charged on a daily basis (from the date the product is activated) until the end of the current year. Publication is automatically extended for another year – unless automatic renewal is deactivated or the product is deleted beforehand. All services will be combined into one invoice where possible and sent by email. Fees already incurred cannot be refunded, even in the event of a negative review.

Quality assurance for product on initial declaration Every product on baubook is validated and quality assured.	Price per product		
Graduated prices (Price 1.–5. + Price 6.–20. etc.)	1.–5.	6.–20.	from 21.
General products	102,-	92,-	75,-
Composite products such as windows (in addition to the price of individual components such as frames)	45,-	45,-	45,-
Superstructures	117,-	117,-	117,-

Quality assurance for product changes	Price per product		
For product changes, baubook quality assurance will be free of charge from 1 January 2026! Our aim is to encourage manufacturers to continuously update their products so that they can be presented on baubook in their latest form at no additional cost.	free 		

Product registration (declaration) by baubook. You provide the product data, and we will take care of the rest.	Price per product		
Graduated prices (Price 1.–5. + Price 6.–20. etc.)	1.–5.	6.–20.	from 21.
Product registration by baubook GmbH (excluding EPD data)	166,-	166,-	166,-
Product update by baubook GmbH (excluding EPD data)	111,-	111,-	84,-
Entering EPD data via import file	106,-	69,-	69,-
Independent declaration (plus one-time quality assurance by baubook for the initial declaration)	free	free	free

Product service and publication contribution Quality assurance for product changes, publication (listing) on all platforms	Price per product per year			
Graduated prices (Price 1.–5. + Price 6.–20. etc.)	1.–5.	6.–20.	21.–45.	from 46.
General products, composite products (e.g. windows)	125,-	101,-	80,-	12,-
Superstructures	116,-	116,-	116,-	116,-

Retailers – Product range selection Listing of traded products on all baubook platforms	Price per product per year			
Graduated prices (Price 1.–5. + Price 6.–20. etc.)	1.–5.	6.–20.	21.–45.	from 46.

Tools and licences

Licence costs baubook tool per year	Single (1 tool)	Double (2 tools)	Triple (3 tools)
eco2soft – life cycle assessment of buildings	184,-	245,-	305,-
baubook online produktmanager	184,-	245,-	305,-
AWR – Amortisation and profitability calculator	184,-	245,-	305,-
construction calculator	free	free	free

We offer students free full versions for use in master's theses and dissertations (registration/proof required).

Licence fees universities for baubook „eco2soft“	Combi price per year
5 research accesses and 100 student accesses	1.070,-
10 research accesses and 200 student accesses	1.300,-
20 research accesses and 400 student accesses	1.550,-
50 research accesses and 1.000 student accesses	1.980,-

All prices are in euros plus VAT at the statutory rate. For the first invoice, the fees are calculated to the day (14 days from the order date) and charged pro rata to the annual costs. Subsequent years will be invoiced on a full-year basis. Cancellation of the contract is possible until 31 December. Years already started will be invoiced in full. There will be no reimbursement.

Brief information on the baubook tools

baubook eco2soft is an online tool from baubook GmbH that can be used to easily and quickly create life cycle assessments for buildings and clearly display the expenditure for construction, renovation and disposal.

www.baubook.info/eco2soft

The aim of the **baubook amortisation and profitability calculator (AWR)** is to calculate the ecological amortisation of insulation measures, especially in renovation. The focus is on a life-cycle approach - the costs of producing the insulation system are compared with the savings in heating over the period under consideration.

www.baubook.info/awr

The **baubook Online Product Manager** is a processing tool to simplify product management within building certification programmes. The products used are submitted for approval on the construction side for each trade. The products are then checked by the product manager and either approved, rejected or alternatives to the selected product are suggested.

www.baubook.info/produktmanager

The **baubook calculator for building components** enables the composition of walls, ceilings, floors, roofs and windows using the quality-assured products and reference values from the baubook.

Manufacturer platform – product presentation in the database

We offer manufacturers the possibility to operate an individual manufacturer platform on the baubook homepage. This means that manufacturers are represented exclusively and prominently and can present the listed products clearly and with detailed information. In

addition, further contents (sales structure of the company, current information, news, dates, download area, etc.) can be added to the manufacturer platform.

Manufacturer platform (database with news and product section)	Price
Creation including training (one-time)	4.880,-
Publication contribution per year	3.190,-

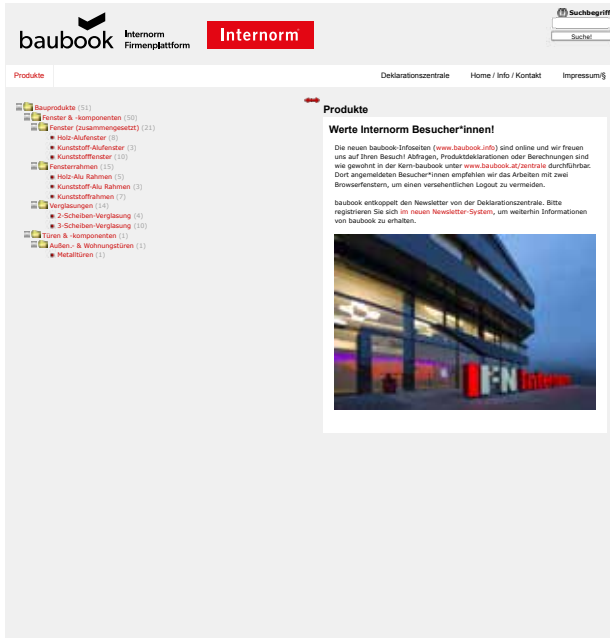

Advantages with a baubook manufacturer platform:

- exclusive communication and presentation opportunities for manufacturers
- own communication channel on www.baubook.info
- presentation possibility of products and services in the individual area
- direct communication with the baubook target group (all baubook users)
- strengthening of own brand presence by displaying logos, photos, documents, products, news, ...
- contents are independently maintainable and modifiable
- direct linking to the listed products in baubook
- company presentation already on the baubook start page with company logo and short text

Detailed view of the product on the manufacturer platform

Presentation of the technical product characteristics

Company presentation

With the „Company and Dealer Presentation“, we offer customers an attractive opportunity to present their products and companies individually on baubook. Manufacturers or dealers are prominently listed and presented. Published and traded products are directly linked to the baubook product database and are easy to find.

Companies actively present themselves and can communicate specific content directly to the baubook target group. Publication requires acceptance of our terms and conditions and an active product in the baubook database.

Company presentation (News and product section)	Price
Creation including training (one-time)	1.480,-
Publication contribution per year	790,-

REINHOLZ

Innovative, patentierte Verbundelemente aus REINEM Holz mit besten bauphysikalischen und ökologischen Eigenschaften bieten viele Einsatzmöglichkeiten. REINHOLZ-FUR besitzt durch einen monolithischen, einheitlichen Aufbau aus Vollholz.

Unsere Technologien bildet das Fundament für die Entwicklung von Konstruktionen ohne Zusätze wie Dampfsperren und synthetische Dämmstoffe.

REINHOLZ GmbH

Die REINHOLZ Verbundelemente in Fertigteilherstellung sowie der REINFLOCK Dämmstoff bestehen zu 100 % aus reinem Holz. Keine Schadstoffe, keine Folien, keine Chemie, nicht einmal Leim. REINHOLZ-FUR und REINHOLZ-MULTI machen es möglich völlig ohne Zusätze wie Dampfsperren und synthetische Dämmstoffe auszukommen.

Das aus der unmittelbaren Umgebung gelieferte Holz wird zu 100 % verarbeitet und kann auch zu 100 % wiederverwendet oder der Natur zurückgegeben werden. Sogar die REINFLOCK Dämmung besteht ausschließlich aus Hohenleihen, die in der Produktion anfallen.

Produziert werden die Elemente komplett im Werk Oberwölz. Unser langjähriges Know-how im ökologischen Holzbau mit innovativen Technologien fließt in jedem Arbeitsschritt ein – REINHOLZ ist Teil des erfolgreichen Mutterunternehmens Hansmann Holzbau.
